## Subject index

### Volume 91 (1996)

**Age and gender difference;** Ascorbic acid; Dehydroascorbic acid reductase; Rat liver **91, 165**

**Aging;** Calorie restriction; Catalase; Glutathione peroxidase; Mice; Superoxide dismutase; Ubiquitin **91, 115**

**Aging;** Cytochrome oxidase; Densitometry; dLGN **91, 47**

**Aging;** Dietary restriction; Physical exercise; Immune function **91, 219**

**Aging;** Graft versus host reaction; Lactation; Multiparity; Thymus **91, 1**

**Aging;** Hepatectomy; Malnutrition; Protein synthesis; Regenerating rat liver; Serum amino acids **91, 55**

**Aging;** Hyperbaric oxygen; Ischemia; Surgical flaps; Tensile strength; Wound healing **91, 131**

**Aging;** Mathematical model; Thymus; T cell development **91, 195**

**Alkaline phosphatase;** Cathepsin; Collagen; In vitro aging; Periodontal ligament cells **91, 171**

**Alzheimer's disease;** DNA damage; Excitotoxicity; Genetic; Inflammatory; Oxidative; Review **91, 95**

**Ascorbic acid;** Age and gender difference; Dehydroascorbic acid reductase; Rat liver **91, 165**

**Calorie restriction;** Aging; Catalase; Glutathione peroxidase; Mice; Superoxide dismutase; Ubiquitin **91, 115**

**Capillary network;** Glomerular morphometry; Kidney aging; Renal filtration rate **91, 11**

**Catalase;** Aging; Calorie restriction; Glutathione peroxidase; Mice; Superoxide dismutase; Ubiquitin **91, 115**

**Cataract;**  $\alpha$ -crystallin; Glycation; Lens; L-threose; Membranes; MP26 **91, 65**

**Cathepsin;** Alkaline phosphatase; Collagen; In vitro aging; Periodontal ligament cells **91, 171**

**Cell proliferation;** Cellular senescence; 1,25-Dihydroxyvitamin D<sub>3</sub>; IMR-90 human fibroblasts **91, 23**

**Cellular senescence;** Cell proliferation; 1,25-Dihydroxyvitamin D<sub>3</sub>; IMR-90 human fibroblasts **91, 23**

**Collagen;** Alkaline phosphatase; Cathepsin; In vitro aging; Periodontal ligament cells **91, 171**

**$\alpha$ -crystallin;** Cataract; Glycation; Lens; L-threose; Membranes; MP26 **91, 65**

**Cytochrome oxidase;** Aging; Densitometry; dLGN **91, 47**

**Dehydroascorbic acid reductase;** Age and gender difference; Ascorbic acid; Rat liver **91, 165**

**Densitometry;** Aging; Cytochrome oxidase; dLGN **91, 47**

**Dietary restriction;** Physical exercise; Immune function; Aging **91, 219**

- 3,4-dihydroxyphenylacetic acid**; Dopamine; 5-hydroxyindol-3-acetic acid; Memory; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Recognition; Serotonin **91, 37**
- 1,25-Dihydroxyvitamin D<sub>3</sub>**; Cell proliferation; Cellular senescence; IMR-90 human fibroblasts **91, 23**
- dLGN**; Aging; Cytochrome oxidase; Densitometry **91, 47**
- DNA damage**; Alzheimer's disease; Excitotoxicity; Genetic; Inflammatory; Oxidative; Review **91, 95**
- DNA repair**; Maximum life span; Nuclear and mitochondrial mutagenesis; Tumorigenesis **91, 211**
- Dopamine**; 3,4-dihydroxyphenylacetic acid; 5-hydroxyindol-3-acetic acid; Memory; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Recognition; Serotonin **91, 37**
- Drosophila**; Life span; Variations; Geroprotector; TemPO; Unstable efficiency **91, 155**
- Excitotoxicity**; Alzheimer's disease; DNA damage; Genetic; Inflammatory; Oxidative; Review **91, 95**
- Genetic**; Alzheimer's disease; DNA damage; Excitotoxicity; Inflammatory; Oxidative; Review **91, 95**
- Geroprotector**; Life span; Variations; TemPO; Unstable efficiency; Drosophila **91, 155**
- Glomerular morphometry**; Capillary network; Kidney aging; Renal filtration rate **91, 11**
- Glutathione peroxidase**; Aging; Calorie restriction; Catalase; Mice; Superoxide dismutase; Ubiquitin **91, 115**
- Glycation**;  $\alpha$ -crystallin; Cataract; Lens; L-threose; Membranes; MP26 **91, 65**
- Graft versus host reaction**; Aging; Lactation; Multiparity; Thymus **91, 1**
- Hayflick limit to lifespan**; Human T lymphocytes; Immortalization; Immune memory responses; Immunosenescence; Telomerase **91, 145**
- Hepatectomy**; Aging; Malnutrition; Protein synthesis; Regenerating rat liver; Serum amino acids **91, 55**
- Human T lymphocytes**; Hayflick limit to lifespan; Immortalization; Immune memory responses; Immunosenescence; Telomerase **91, 145**
- 5-hydroxyindol-3-acetic acid**; 3,4-dihydroxyphenylacetic acid; Dopamine; Memory; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Recognition; Serotonin **91, 37**
- Hyperbaric oxygen**; Aging; Ischemia; Surgical flaps; Tensile strength; Wound healing **91, 131**
- Immortalization**; Hayflick limit to lifespan; Human T lymphocytes; Immune memory responses; Immunosenescence; Telomerase **91, 145**
- Immune function**; Dietary restriction; Physical exercise; Aging **91, 219**
- Immune memory responses**; Hayflick limit to lifespan; Human T lymphocytes; Immortalization; Immunosenescence; Telomerase **91, 145**
- Immunosenescence**; Hayflick limit to lifespan; Human T lymphocytes; Immortalization; Immune memory responses; Telomerase **91, 145**
- IMR-90 human fibroblasts**; Cell proliferation; Cellular senescence; 1,25-Dihydroxyvitamin D<sub>3</sub> **91, 23**
- Inflammatory**; Alzheimer's disease; DNA damage; Excitotoxicity; Genetic; Oxidative; Review **91, 95**
- In vitro aging**; Alkaline phosphatase; Cathepsin; Collagen; Periodontal ligament cells **91, 171**
- Ischemia**; Aging; Hyperbaric oxygen; Surgical flaps; Tensile strength; Wound healing **91, 131**
- Kidney aging**; Capillary network; Glomerular morphometry; Renal filtration rate **91, 11**
- Lactation**; Aging; Graft versus host reaction; Multiparity; Thymus **91, 1**

**Lens;**  $\alpha$ -crystallin; Cataract; Glycation; L-threose; Membranes; MP26 91, 65

**Life span;** Variations; Geroprotector; TemPO; Unstable efficiency; *Drosophila* 91, 155

**L-threose;**  $\alpha$ -crystallin; Cataract; Glycation; Lens; Membranes; MP26 91, 65

**Malnutrition;** Aging; Hepatectomy; Protein synthesis; Regenerating rat liver; Serum amino acids 91, 55

**Mathematical model;** Aging; Thymus; T cell development 91, 195

**Maximum life span;** DNA repair; Nuclear and mitochondrial mutagenesis; Tumorigenesis 91, 211

**Membranes;**  $\alpha$ -crystallin; Cataract; Glycation; Lens; L-threose; MP26 91, 65

**Memory;** 3,4-dihydroxyphenylacetic acid; Dopamine; 5-hydroxyindol-3-acetic acid; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Recognition; Serotonin 91, 37

**3-methoxy-4-hydroxyphenyl glycol;** 3,4-dihydroxyphenylacetic acid; Dopamine; 5-hydroxyindol-3-acetic acid; Memory; Norepinephrine; Recognition; Serotonin 91, 37

**Mice;** Aging; Calorie restriction; Catalase; Glutathione peroxidase; Superoxide dismutase; Ubiquitin 91, 115

**MP26;**  $\alpha$ -crystallin; Cataract; Glycation; Lens; L-threose; Membranes 91, 65

**Multiparity;** Aging; Graft versus host reaction; Lactation; Thymus 91, 1

**Norepinephrine;** 3,4-dihydroxyphenylacetic acid; Dopamine; 5-hydroxyindol-3-acetic acid; Memory; 3-methoxy-4-hydroxyphenyl glycol; Recognition; Serotonin 91, 37

**Nuclear and mitochondrial mutagenesis;** DNA repair; Maximum life span; Tumorigenesis 91, 211

**Oxidative;** Alzheimer's disease; DNA damage; Excitotoxicity; Genetic; Inflammatory; Review 91, 95

**Periodontal ligament cells;** Alkaline phosphatase; Cathepsin; Collagen; In vitro aging 91, 171

**Physical exercise;** Dietary restriction; Immune function; Aging 91, 219

**Protein synthesis;** Aging; Hepatectomy; Malnutrition; Regenerating rat liver; Serum amino acids 91, 55

**Rat liver;** Age and gender difference; Ascorbic acid; Dehydroascorbic acid reductase 91, 165

**Recognition;** 3,4-dihydroxyphenylacetic acid; Dopamine; 5-hydroxyindol-3-acetic acid; Memory; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Serotonin 91, 37

**Regenerating rat liver;** Aging; Hepatectomy; Malnutrition; Protein synthesis; Serum amino acids 91, 55

**Renal filtration rate;** Capillary network; Glomerular morphometry; Kidney aging 91, 11

**Review;** Alzheimer's disease; DNA damage; Excitotoxicity; Genetic; Inflammatory; Oxidative 91, 95

**Serotonin;** 3,4-dihydroxyphenylacetic acid; Dopamine; 5-hydroxyindol-3-acetic acid; Memory; 3-methoxy-4-hydroxyphenyl glycol; Norepinephrine; Recognition 91, 37

**Serum amino acids;** Aging; Hepatectomy; Malnutrition; Protein synthesis; Regenerating rat liver 91, 55

**Superoxide dismutase;** Aging; Calorie restriction; Catalase; Glutathione peroxidase; Mice; Ubiquitin 91, 115

**Surgical flaps;** Aging; Hyperbaric oxygen; Ischemia; Tensile strength; Wound healing 91, 131

**T cell development;** Aging; Mathematical model; Thymus 91, 195

**Telomerase;** Hayflick limit to lifespan; Human T lymphocytes; Immortalization; Immune memory responses; Immunosenescence 91, 145

**TemPO**; Life span; Variations; Geroprotector; Unstable efficiency; *Drosophila* **91**, 155

**Tensile strength**; Aging; Hyperbaric oxygen; Ischemia; Surgical flaps; Wound healing **91**, 131

**Thymus**; Aging; Graft versus host reaction; Lactation; Multiparity **91**, 1

**Thymus**; Aging; Mathematical model; T cell development **91**, 195

**Tumorigenesis**; DNA repair; Maximum life span;

Nuclear and mitochondrial mutagenesis **91**, 211

**Ubiquitin**; Aging; Calorie restriction; Catalase; Glutathione peroxidase; Mice; Superoxide dismutase **91**, 115

**Unstable efficiency**; Life span; Variations; Geroprotector; TemPO; *Drosophila* **91**, 155

**Variations**; Life span; Geroprotector; TemPO; Unstable efficiency; *Drosophila* **91**, 155

**Wound healing**; Aging; Hyperbaric oxygen; Ischemia; Surgical flaps; Tensile strength **91**, 131
